

PROPERTY TAX APPEAL BOARD'S DECISION

APPELLANT: Virginia Warnecke
DOCKET NO.: 03-24347.001-R-1
PARCEL NO.: 14-19-129-008-0000

The parties of record before the Property Tax Appeal Board are Virginia Warnecke, the appellant, by attorney Rusty A. Payton of the Law Offices of Rusty A. Payton, P.C., Chicago, Illinois; and the Cook County Board of Review.

The subject property consists of a 105-year old, one-story apartment building of frame construction containing 1,683 square feet of living area with a full finished basement.

The appellant submitted evidence before the Property Tax Appeal Board claiming unequal treatment in the assessment process as the basis of the appeal. In support of the equity argument, the appellant submitted a grid analysis detailing four suggested comparable properties. The appellant's map indicates that three comparables are in close proximity to the subject and one comparable is two and three-quarters of a mile from the subject. The comparables are two-story apartment buildings of frame construction that range in age from 95 to 105 years. One comparable has an unfinished basement and two comparables have full basements. Their living areas are from 2,997 to 4,341 square feet in size, and have improvement assessments of \$12.38 to \$14.07 per square foot. The subject property has an improvement assessment of \$27.17 per square foot. Based on this evidence, the appellant requested a reduction in the subject's improvement assessment.

The board of review submitted its "Board of Review Notes on Appeal" wherein the subject's final assessment was disclosed. In support of the subject's assessment, the board of review offered the property characteristic sheets and a spreadsheet detailing three suggested comparable properties that are located in close proximity to the subject. The comparable properties consist of

Based on the facts and exhibits presented, the Property Tax Appeal Board hereby finds a reduction in the assessment of the property as established by the Cook County Board of Review is warranted. The correct assessed valuation of the property is:

LAND:	\$	5,760
IMPR.:	\$	35,562
TOTAL:	\$	41,322

two-story apartment buildings of frame or masonry construction that range in age from 42 to 98 years with two car detached garages. Two comparables have full, unfinished basements and one comparable has a full, finished basement. The dwellings contain 1,620 to 1,982 square feet of living area and have improvement assessments ranging from \$21.95 to \$23.77 per square foot. Based on this evidence, the board of review requested confirmation of the subject's assessment.

After reviewing the record and considering the evidence, the Property Tax Appeal Board finds that it has jurisdiction over the parties and the subject matter of this appeal. The Property Tax Appeal Board further finds that a reduction in the subject's assessment is warranted. The appellant's argument was unequal treatment in the assessment process. The Illinois Supreme Court has held that taxpayers who object to an assessment on the basis of lack of uniformity bear the burden of proving the disparity of assessment valuations by clear and convincing evidence. Kankakee County Board of Review v. Property Tax Appeal Board, 131 Ill.2d 1 (1989). The evidence must demonstrate a consistent pattern of assessment inequities within the assessment jurisdiction. After an analysis of the assessment data, the Board finds the appellant has overcome this burden.

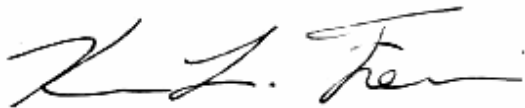

Both parties presented assessment data on a total of seven equity comparables. The appellant's comparables were significantly larger than the subject and differed from the subject in design. Comparable four was located two and three-quarters of a mile from the subject. The board of review's comparable three was significantly newer than the subject and also differed from the subject in design. As a result, they received reduced weight in the board's analysis. The board of review's comparable one and two differed from the subject in design but were most similar to the subject in location, age, and physical characteristics and received the greatest weight in the Board's analysis. They had improvement assessments of \$21.95 to \$23.77 per square foot. The subject's improvement assessment of \$27.17 per square foot falls above the range established by these comparables. After considering adjustments and the differences in both parties' suggested comparables when compared to the subject property, the Board finds the subject's per square foot improvement assessment is not supported by the most comparable properties contained in the record and a reduction in the subject's assessment is warranted.

As a result of this analysis, the Property Tax Appeal Board finds the appellant has adequately demonstrated that the subject dwelling was inequitably assessed by clear and convincing evidence and a reduction is warranted.

This is a final administrative decision of the Property Tax Appeal Board are subject to review in the Circuit Court or Appellate Court under the provisions of the Administrative Review Law (735 ILCS 5/3-101 et seq.) and section 16-195 of the Property Tax Code.
